

YAMUNA PLASTICS

Mobile Billing & Tally Prime Integration System Complete Features & Technical Specification Document

Client / Project: Yamuna Plastics	Prepared On: September 25, 2026	System Version: v2.0 (TallyPrime Ready)
--------------------------------------	------------------------------------	--

1. Executive Summary

The Yamuna Plastics Billing & Tally Prime Integration System is an end-to-end enterprise solution bridging factory warehouse operations with back-office Tally Prime accounting. Staff can create GST-compliant sales invoices in under 30 seconds from any mobile device, automatically calculate statutory taxes, track logistics, auto-generate government-compliant e-Way Bills, and push complete vouchers directly into Tally Prime with a single click—eliminating manual double entry and billing errors.

2. Core Feature Modules

Module 1: Mobile & Web Billing Platform

- **Mobile-First Factory Billing:** Fast, intuitive responsive interface optimized for smartphones, tablets, and desktop computers. Warehouse staff can bill shipments directly at loading docks.
- **Automated GST & Math Engine:** Auto-detects Intra-State (CGST 9% + SGST 9%) vs Inter-State (IGST 18%) from buyer state code. Pre-fills HSN codes (e.g. 39235010) and calculates legal tax amounts.
- **Smart Round-Off & Amount in Words:** Computes fractional round-offs and generates legal amount in words.
- **Logistics & Dispatch Tracking:** Captures Vehicle Registration Number (GJ-01-AB-1880), Transporter Name, Approx Distance (85 KM), Delivery Note Number (188), and Destination Plant.

Module 2: 1-Click Tally Prime Sync (Direct HTTP:9000)

- **Direct Day Book Push:** Pushes complete sales vouchers directly into Tally Prime over HTTP port 9000 with a single click. Zero manual data re-entry.
- **Active Company Auto-Detection:** Dynamically senses whichever company is open in Tally (e.g. 'Sanmati Solution' or 'Yamuna Plastics'), preventing configuration mismatches.
- **Real-Time Verification:** Reads Tally's response XML (10) and stores the Tally Last Voucher ID in the audit trail.
- **Offline Fallback:** Provides immediate 'Download Tally XML' backup if Tally or network connectivity is temporarily offline.

Module 3: 100% Automated e-Way Bill Lifecycle (Option 1)

- **Automatic e-Way Bill Generation:** Generates the statutory 12-digit e-Way Bill number (e.g. 2418882500623) with validity dates immediately upon saving an invoice.
- **Zero-Halt Statutory Tally XML Injection:** Pre-fills <ISGST_EWAYBILLAPPLICABLE>Yes</ISGST_EWAYBILLAPPLICABLE> and complete <EWAYBILLDETAILS.LIST> tags so Tally Prime marks the e-Way Bill as already generated without pausing for manual entry.
- **Two-Way EWB Synchronization:** Clicking 'Sync e-Way Bills from Tally' retrieves official government e-Way bill numbers and validity dates back from Tally Prime into the mobile database.
- **Credentials Configuration Card:** Dedicated settings screen in the web app to manage GSTIN (24AKNPP7596H1ZF), portal username, password, GSP client ID, and Dispatch PIN (382350).

Module 4: 1:1 Exact Invoice Printout (Replicating '186 instaplast.pdf')

- **Exact Grid & Box Structure:** Replicates the client's official invoice format across both the mobile application and Tally Prime.
- **e-Invoice QR Code & IRN Header:** Includes official 'Tax Invoice (ORIGINAL FOR RECIPIENT)' title, Ack No, Ack Date, and 64-character IRN banner.
- **Order & Dispatch Grid:** Displays Delivery Note (186/188), Delivery Note Date, and Destination (Himmatnagar).
- **HSN Statutory Tax Analysis:** Dedicated summary box breaking down Taxable Value, CGST rate/amount, SGST rate/amount, and total tax amount.
- **Company Bank Details Auto-Populated:** Displays The Karnavati Co-Op. Bank Ltd., A/c No: 124002005002108, IFSC: GSCB0UTKCBL, Branch: Bapunagar.
- **Dual Signature Blocks:** Prints 'Customer's Seal and Signature' box alongside 'for YAMUNA PLASTIC / Authorised Signatory'.

Module 5: Smart Address Formatting Engine

- **Eliminates Squished / Barcode Text:** In Tally Prime, a long 140-character single-line address is horizontally squished down to 25% width. Our engine automatically splits long addresses at commas into 4 neat lines (~40 characters each) and emits separate <CONSIGNEEADDRESS> and <BASICBUYERADDRESS> tags.

Module 6: Automatic Master & Ledger Creation

- **Zero Voucher Errors:** Customer ledgers (Sundry Debtors), Stock Items (T. C. INNER, HDPE Plain Liner Bags), and Bank Ledgers (The Karnavati Co-Op. Bank Ltd.) are auto-created in Tally if they do not exist.

Module 7: Tally GUI Integration & Hotkeys (TDL)

- **F6 Hotkey in Tally Prime:** Pressing F6 directly on Gateway of Tally connects to the mobile API and pulls all pending bills into Day Book. Standalone TDL with zero syntax errors (verified in tallyerr.log).

3. Comparison: Manual Process vs. Yamuna Plastics Solution

Operation	Manual / Traditional Process	Yamuna Plastics Integrated System
Invoice Generation	Handwritten chits or manual desktop entry in office (5-10 mins)	Mobile app creation at warehouse dock in 30 seconds
Tally Entry	Accountant manually re-types every invoice into Tally	1-Click HTTP Push directly into Tally Day Book
e-Way Bill	Login to portal, retype vehicle & invoice, download PDF	100% Automatic generation & 2-way sync with Tally
Missing Ledgers	Voucher fails if customer or item is not created	Auto-created in Tally before voucher is posted
Print Quality	Mismatched formats, missing bank details or QR	1:1 Exact replica of '186 instaplast.pdf'
Address Layout	Squished/unreadable text due to 140-char line	Smart multi-line formatting produces crisp 4-line text
